## 4 FINANCIAL INFORMATION 2025

Directional net debt slightly decreased by US\$(68) million from US\$5,719 million at December 31, 2024 to US\$5,651 million at December 31, 2025. While the Turnkey (as a result of recent Sale and Operate contracts) and the Lease and Operate segments generated strong operating cash flows, the Company (i) implemented of a new financing tool with the sale and leaseback financing agreement for *FPSO Cidade de Paraty* fully drawn during the period, (ii) continued to draw on project finance facilities for *FPSO Alexandre de Gusmão* and *FPSO ONE GUYANA* to finalize the related investment in growth and (iii) implemented the construction financing for *FPSO Jaguar*. These were partially offset by (iv) the scheduled repayment of non-recourse project debt, (v) the full repayment of the MPF facility, (vi) the partial repayment of the RCF, (vii) the full repayment of the US private placement notes in relation to *FPSO Cidade de Anchieta* and (viii) the strong return to shareholders.

More than two thirds of the Company's Directional debt, as of December 31, 2025, consisted of non-recourse project financing (US\$5.3 billion) in special purpose investees. The remainder (US\$1.1 billion) comprised (i) the construction financing for *FPSO Jaguar* which will be repaid following completion of construction, and (ii) the Company's new RCF, which was drawn for US\$100 million as at December 31, 2025. Directional cash and cash equivalents amounted to US\$891 million (December 31, 2024: US\$606 million) and lease liabilities totaled US\$115 million (December 31, 2024: US\$93 million).

Directional net debt is reconciled to IFRS figures as follows:

Directional total assets increased to US\$11.7 billion as at December 31, 2025, compared with US\$10.8 billion at year-end 2024, following (i) the investments in property, plant and equipment for FPSOs under construction during the period net of depreciation of the period on FPSOs under operation, (ii) the investments in multi-purpose floater hulls and related equipment under construction for use in future projects, (iii) the increase of contract assets and receivables mostly related to FPSO projects under construction at the end of the year and (iv) net cash generation.

Directional cash from operating activities for the period was positive at US\$1,166 million. This reflected strong cash flows generated by the fleet under operations and the positive Turnkey cash flows benefiting mostly from client milestone payments on Sale and Operate model FPSO projects.

The Company generated strong Directional operating cash flows mainly as a result of the cash flow from the expanded fleet under operations and the positive turnkey cash flows benefiting from client's milestone payments on FPSO projects under construction (mostly on Sale and Operate contracts).

Cash generated from Directional operating cash flows and drawdowns on project and construction financing, together with some of the Company's existing cash, was primarily used to:

- Invest in the four Lease and Operate FPSOs/FSO under construction over the period and the Fast4Ward® new build multi-purpose hulls and related equipment for use in future projects;
- Full repayment of the US private placement notes in relation to the *FPSO Cidade de Anchieta* and the existing RCF;
- Return funds to shareholders through dividends and share repurchase programs; and
- Service the Company's non-recourse debt and interest in accordance with the respective repayment schedules.

The Company completed the acquisition of the shares in the lease and operating entities related to *FPSO Espirito Santo*, the sale of all its shares in the parent company of *FPSO Kikeh* and the sale of all its shares in the lease and operating entities related to *FPSO Aseng*, which are all reported as investing activities within the Directional cash flow statement.

As a result, Directional cash and cash equivalents increased from US\$642 million (including US\$36 million classified as held for sale) at year-end 2024 to US\$891 million at year-end 2025.
